JOURNAL OF SPACECRAFT AND ROCKETS
Vol. 43, No. 6, November–December 2006

2006 *Journal of Spacecraft and Rockets* Index

How to Use the Index

In the Subject Index, pages 1427–1432, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, pages 1433–1434, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1435–1440, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2006, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

Aerodynamics

A06-081 Numerical and Experimental Investigation of PRORA USV Subsonic and Transonic Aerodynamics
A06-123 Modeling and Simulation of Turbulent Reacting Flow Around a Hypersonic Space Probe
A06-104 Roll-Rate Stability Limits of Unguided Rockets with Wraparound Fins
A06-101 Experiment of the Two-Dimensional Roughness Effect on Hypersonic Boundary-Layer Transition
A06-100 Aerodynamic Stability of Reentry Heat Shield Shapes for a Crew Exploration Vehicle
A06-038 Free-Flight Testing in Support of the Mars Science Laboratory Aerodynamics Database
A06-084 Steering Moments Creation in Supersonic Flow by Off-Axis Plasma Heat Addition
A06-098 Extending the Jump Analysis for Aerodynamic Asymmetry

Aeroelasticity and Aeroservoelasticity

A06-181 Effects of Angle-of-Attack on the Aeroelastic Characteristics of a Wing with Freeplay

Aerospace Plane

A06-122 New Calculation Method of Supersonic/Hypersonic Flow: Application to Hypersonic MESUR Capsule Flowfield

Collision Avoidance

A06-092 Deorbit Process Using Solar Radiation Force

Deceleration Systems

A06-094 Aerodynamic Characteristics of Frustum-Shaped Elastic Membrane Aeroshells in Supersonic Flow

Flight Control Integration

A06-183 Evaluation of Guidance and Control Systems of a Balloon-Launched Drop-Test Vehicle

Noise

A06-117 Noise Control of Mock-Scale Chamber-Core Payload Fairing Using Integrated Acoustic Resonators

Structural Materials

A06-117 Noise Control of Mock-Scale Chamber-Core Payload Fairing Using Integrated Acoustic Resonators
A06-058 Surface Modification of Conductive and Nonconductive Paints for Space Durability Enhancement
A06-143 Micromechanical Models for Bending Behavior of Woven Composites
A06-079 Damage Features of Zr41Ti14Cu12.5-Ni10Be22.5 Bulk Metallic Glass Impacted by Hypervelocity Projectiles

Testing, Flight and Ground

A06-160 Design of a Pulse-Facility Nozzle Using the Rotational Method Of Characteristics
A06-129 Laser Window Design for the Army Hypersonic Compact Kinetic Energy Missile
A06-058 Surface Modification of Conductive and Nonconductive Paints for Space Durability Enhancement
A06-069 Kinetics of Radiation Damage of Quartz Glass by Low-Energy Protons

Uninhabited and Unmanned Air Vehicles

A06-135 Design of the ARES Mars Airplane and Mission Architecture

Vibration

A06-153 Active Vibration Isolation of Rigid Body Using a Pneumatic Octostrut Platform

Weather Hazards

A06-032 Radar Evaluation of Optical Cloud Constraints to Space Launch Operations

COMPUTING, INFORMATION, AND COMMUNICATION

Aerospace Electronics

A06-072 Multilevel Radiation Protection of Partially Reconfigurable Field Programmable Gate Array Devices

ENERGY

Photovoltaic Power

A06-066 Radiation Effects of Protons and Electrons on Backfield Silicon Solar Cells

Solar Power

A06-066 Radiation Effects of Protons and Electrons on Backfield Silicon Solar Cells
A06-092 Deorbit Process Using Solar Radiation Force

FLIGHT SIMULATOR SYSTEMS

Guidance, Navigation, and Control Systems

A06-098 Extending the Jump Analysis for Aerodynamic Asymmetry

FLUID DYNAMICS

Boundary Layers and Heat Transfer-Laminar

A06-159 Boundary Layer/Streamline Surface Catalytic Heating Predictions on Space Shuttle Orbiter
A06-173 Effect of Magnetic Fields on Surface Plasma Discharges at Mach 5

Boundary Layers and Heat Transfer-Turbulent

A06-044 Transition Due to Heat-Shield Cavities on a Mars Entry Vehicle

Boundary-Layer Stability and Transition

A06-101 Experiment of the Two-Dimensional Roughness Effect on Hypersonic Boundary-Layer Transition
A06-155 Laminar-Turbulent Transition on Reentry Capsules and Planetary Probes
A06-114 Effect of Computational Method on Discrete Roughness Correlations for Shuttle Orbiter
A06-007 Mach 6 Boundary-Layer Stability Experiments on Sharp and Blunt Cones
A06-043 Mars Science Laboratory Experimental Aerothermodynamics with Effects of Cavities and Control Surfaces

Computational Fluid Dynamics

A06-025 Fluid-Throat-Induced Shock Waves During the Ignition Transient of Solid Rockets
A06-115 Study of the Ignition Overpressure Suppression Technique by Water Addition
A06-122 New Calculation Method of Supersonic/Hypersonic Flow: Application to Hypersonic MESUR Capsule Flowfield
A06-150 Studies on Internal Flow Choking in Dual-Thrust Motors
A06-008 Computational Aerodynamic Analysis of Capsule Configurations Toward the Development of Reusable Rockets
A06-009 Simulation of Missiles with Grid Fins Using an Actuator Disk
A06-036 Experimental Hypersonic Aerodynamic Characteristics of Mars Surveyor 2001 Precision Lander with Flap
A06-006 Influences of Electrical Conductivity of Wall on Magnetohydrodynamic Control of Aeroynamic Heating
A06-084 Steering Moments Creation in Supersonic Flow by Off-Axis Plasma Heat Addition
A06-165 Simulations of Solid-Propellant Rockets: Effects of Aluminum Droplet Size Distribution
A06-042 Aeroheating Environments for a Mars Smart Lander

A06-044 Transition Due to Heat-Shield Cavities on a Mars Entry Vehicle
A06-081 Numerical and Experimental Investigation of PRORA USV Subsonic and Transonic Aerodynamics
A06-039 Aerodynamic Database Development for Mars Smart Lander Vehicle Configurations

Hypersonic Flow

A06-160 Design of a Pulse-Facility Nozzle Using the Rotational Method Of Characteristics
A06-101 Experiment of the Two-Dimensional Roughness Effect on Hypersonic Boundary-Layer Transition
A06-097 Uncertainty Evaluation of Thermocouple Aeroheating Measurements for Hypersonic Wind-Tunnel Tests
A06-173 Effect of Magnetic Fields on Surface Plasma Discharges at Mach 5
A06-042 Aeroheating Environments for a Mars Smart Lander
A06-036 Experimental Hypersonic Aerodynamic Characteristics of Mars Surveyor 2001 Precision Lander with Flap
A06-100 Aerodynamic Stability of Reentry Heat Shield Shapes for a Crew Exploration Vehicle
A06-007 Mach 6 Boundary-Layer Stability Experiments on Sharp and Blunt Cones
A06-114 Effect of Computational Method on Discrete Roughness Correlations for Shuttle Orbiter
A06-122 New Calculation Method of Supersonic/Hypersonic Flow: Application to Hypersonic MESUR Capsule Flowfield
A06-043 Mars Science Laboratory Experimental Aerothermodynamics with Effects of Cavities and Control Surfaces
A06-125 Afterbody Aeroheating Flight Data for Planetary Probe Thermal Protection System Design
A06-159 Boundary Layer/Streamline Surface Catalytic Heating Predictions on Space Shuttle Orbiter
A06-130 Optimization of Viscous Waveriders Derived from Axisymmetric Power-Law Blunt Body Flows

Multiphase Flows

A06-115 Study of the Ignition Overpressure Suppression Technique by Water Addition
A06-147 Vented Tank Resupply Experiment: Flight Test Results
A06-165 Simulations of Solid-Propellant Rockets: Effects of Aluminum Droplet Size Distribution

Plasmadynamics and MHD

A06-006 Influences of Electrical Conductivity of Wall on Magnetohydrodynamic Control of Aeroynamic Heating

Rarefied Flows

A06-158 Low-Density Aerodynamics for the Inflatable Reentry Vehicle Experiment
A06-020 Computational Analysis of High-Altitude Ionization Gauge Flight Measurements
A06-128 Numerical Study of Behavior of Outgas from Heat Shield of Solar Probe
A06-178 Simulation of Aerodynamic Influences on Rocket-Mounted Oxygen Sensors

Supersonic Flow

A06-028 Experimental Study on Thermal Protection System by Opposing Jet in Supersonic Flow
A06-009 Simulation of Missiles with Grid Fins Using an Actuator Disk
A06-158 Low-Density Aerodynamics for the Inflatable Reentry Vehicle Experiment

Transonic Flow

A06-081 Numerical and Experimental Investigation of PRORA USV Subsonic and Transonic Aerodynamics

Unsteady Flows

A06-010 Linearized Aeroelastic Analysis for a Launch Vehicle in Transonic Flight Conditions

GUIDANCE, CONTROL, AND DYNAMICS TECHNOLOGY

Aircraft Dynamics

A06-011 Hyper-X Post-Flight Trajectory Reconstruction

Aircraft Guidance

A06-183 Evaluation of Guidance and Control Systems of a Balloon-Launched Drop-Test Vehicle

Aircraft Stability and Control

A06-100 Aerodynamic Stability of Reentry Heat Shield Shapes for a Crew Exploration Vehicle
A06-183 Evaluation of Guidance and Control Systems of a Balloon-Launched Drop-Test Vehicle

Astrodynamics

A06-140 Preliminary Design of Low-Thrust Multiple Gravity-Assist Trajectories
A06-012 Optimal Radially Accelerated Interplanetary Trajectories
A06-124 Classical Orbit Element Differences Determination Using Relative Position Coordinates
A06-167 Practical Operation Strategy for Deorbit of an Electrodynamic Tethered System
A06-030 Compound Solar Sail with Optical Properties: Models and Performance
A06-180 Collision Risk Posed to the Global Positioning System by Disposed Upper Stages
A06-137 Trajectories for Human Missions to Mars, Part II: Low-Thrust Transfers
A06-136 Trajectories for Human Missions to Mars, Part I: Impulsive Transfers

Control System Design

A06-062 Libration Control of Tethered Satellites in Elliptical Orbits
A06-083 Propulsion Requirements for Drag-Free Operation of Spacecraft in Low Earth Orbit
A06-108 Testing of Membrane Space Structure Shape Control Using Genetic Algorithm
A06-041 Entry Vehicle Control System Design for the Mars Science Laboratory
A06-145 Distributed and Localized Active Vibration Isolation in Membrane Structures
A06-047 Guidance and Control Design for Hazard Avoidance and Safe Landing on Mars

Dynamics

A06-175 Generator Regime of Self-Balanced Electrodynamic Bare Tethers
A06-088 Equilibrium-to-Equilibrium Maneuvers of Flexible Electrodynamic Tethers in Equatorial Orbits
A06-012 Optimal Radially Accelerated Interplanetary Trajectories
A06-002 Deployment Study of a Self-Rigidizable Inflatable Boom
A06-099 Review on Dynamics and Control of Nonelectrodynamic Tethered Satellite Systems

Flight Mechanics

A06-134 Mars Exploration Rover Six-Degree-of-Freedom Entry Trajectory Analysis
A06-012 Optimal Radially Accelerated Interplanetary Trajectories
A06-040 Mars Science Laboratory Simulations for Entry, Descent, and Landing
A06-182 Flight Dynamics of Unguided Rockets with Free-Rolling Wraparound Tail Fins
A06-046 Mars Science Laboratory Parachute Simulation Model

Intelligent Control

A06-108 Testing of Membrane Space Structure Shape Control Using Genetic Algorithm
A06-167 Practical Operation Strategy for Deorbit of an Electrodynamic Tethered System

Missile Dynamics

A06-104 Roll-Rate Stability Limits of Unguided Rockets with Wraparound Fins
A06-182 Flight Dynamics of Unguided Rockets with Free-Rolling Wraparound Tail Fins

Missile Guidance and Control

A06-129 Laser Window Design for the Army Hypersonic Compact Kinetic Energy Missile
A06-084 Steering Moments Creation in Supersonic Flow by Off-Axis Plasma Heat Addition

Navigation

A06-011 Hyper-X Post-Flight Trajectory Reconstruction
A06-124 Classical Orbit Element Differences Determination Using Relative Position Coordinates
A06-138 Automated Operational Orbit Determination for the Ice Cloud and Land Elevation Satellite Mission

Optimization Techniques

A06-130 Optimization of Viscous Waveriders Derived from Axisymmetric Power-Law Blunt Body Flows
A06-164 Stochastic Spacecraft Thermal Design Optimization with Low Computational Cost
A06-154 Satellite Constellation Design Tradeoffs using Multiple-Objective Evolutionary Computation
A06-151 Direct Numerical Computation of Periodic Orbits and Their Stability
A06-109 Preliminary Design of Multiple Gravity-Assist Trajectories
A06-113 Sensitivity Analysis for Rapid Prototyping of Entry Vehicles

Spacecraft Dynamics

A06-062 Libration Control of Tethered Satellites in Elliptical Orbits
A06-099 Review on Dynamics and Control of Nonelectrodynamic Tethered Satellite Systems
A06-116 Investigation of Force-Limited Vibration for Reduction of Overtesting
A06-040 Mars Science Laboratory Simulations for Entry, Descent, and Landing
A06-154 Satellite Constellation Design Tradeoffs using Multiple-Objective Evolutionary Computation
A06-172 Reconfiguration of Sun-Earth Libration Point Formations Using Solar Radiation Pressure
A06-175 Generator Regime of Self-Balanced Electrodynamic Bare Tethers

Spacecraft Guidance and Control

A06-126 History of Space Shuttle Rendezvous and Proximity Operations
A06-047 Guidance and Control Design for Hazard Avoidance and Safe Landing on Mars
A06-041 Entry Vehicle Control System Design for the Mars Science Laboratory
A06-038 Free-Flight Testing in Support of the Mars Science Laboratory Aerodynamics Database
A06-034 Simple Approach to Orbital Control Using Spinning Electrodynamic Tethers
A06-061 Low-Thrust Spacecraft Formation Keeping
A06-167 Practical Operation Strategy for Deorbit of an Electrodynamic Tethered System
A06-172 Reconfiguration of Sun-Earth Libration Point Formations Using Solar Radiation Pressure
A06-087 Optimal Deployment/Retrieval of a Tethered Formation Spinning in the Orbital Plane

State Estimation

A06-011 Hyper-X Post-Flight Trajectory Reconstruction

Trajectory Optimization

A06-030 Compound Solar Sail with Optical Properties: Models and Performance
A06-013 Low-Thrust Trajectory Optimization Procedure for Gravity-Assist, Outer-Planet Missions
A06-040 Mars Science Laboratory Simulations for Entry, Descent, and Landing
A06-087 Optimal Deployment/Retrieval of a Tethered Formation Spinning in the Orbital Plane

A06-109 Preliminary Design of Multiple Gravity-Assist Trajectories
A06-039 Aerodynamic Database Development for Mars Smart Lander Vehicle Configurations
A06-110 Options for a Nondedicated Mission to Test the Pioneer Anomaly
A06-136 Trajectories for Human Missions to Mars, Part I: Impulsive Transfers
A06-137 Trajectories for Human Missions to Mars, Part II: Low-Thrust Transfers
A06-111 Maximizing Payload Mass Fractions of Spacecraft for Interplanetary Electric Propulsion Missions
A06-140 Preliminary Design of Low-Thrust Multiple Gravity-Assist Trajectories

INTERDISCIPLINARY TOPICS

Aerospace Management

A06-023 To Reduce or to Extend a Spacecraft Design Lifetime?

Aerospace Technology Utilization

A06-023 To Reduce or to Extend a Spacecraft Design Lifetime?
A06-032 Radar Evaluation of Optical Cloud Constraints to Space Launch Operations

Analytical and Numerical Methods

A06-179 Use of Genetic Algorithms and Transient Models for Life Support Systems Analysis
A06-168 Evaluation of Multidisciplinary Optimization Techniques Applied to a Reusable Launch Vehicle
A06-151 Direct Numerical Computation of Periodic Orbits and Their Stability
A06-051 Influence of UV Radiation on Outgassing of Polymeric Composites
A06-064 Interaction Potential between Atomic Oxygen and Polymer Surfaces in Low Earth Orbit
A06-113 Sensitivity Analysis for Rapid Prototyping of Entry Vehicles
A06-015 Multipoint Nose Shape Optimization of Space Launcher Using Response Surface Method
A06-098 Extending the Jump Analysis for Aerodynamic Asymmetry
A06-068 Simulation of Electron Radiation on Outgassing of Spacecraft Materials
A06-022 Simulation of Hypervelocity Impact Effects on Reinforced Carbon-Carbon

Atmospheric and Space Sciences

A06-031 Lower Hybrid Instability in Gas-Dust Formations from Rocket Exhaust in the Ionosphere
A06-178 Simulation of Aerodynamic Influences on Rocket-Mounted Oxygen Sensors
A06-166 New Approach for the Evolution and Expansion of Space Debris Scenario
A06-032 Radar Evaluation of Optical Cloud Constraints to Space Launch Operations
A06-095 Performance Validation of Upgraded Eastern Range 50-Megahertz Doppler Radar Wind Profiler
A06-176 Far-Field Spectral Analysis of a Space Shuttle Vernier Reaction Control System Firing

Environmental Effects

A06-019 Spatial and Temporal Correlation of Spacecraft Surface Charging in Geosynchronous Orbit
A06-074 Degradation Testing of Spacecraft Materials for Long Flights in Low Earth Orbit
A06-055 Homogeneous Silica Formed by the Oxidation of Si(100) in Hyperthermal Atomic Oxygen
A06-079 Damage Features of Zr41Ti14Cu12.5-Ni10Be22.5 Bulk Metallic Glass Impacted by Hypervelocity Projectiles
A06-051 Influence of UV Radiation on Outgassing of Polymeric Composites
A06-048 Effects of Vacuum Ultraviolet Radiation on DC93-500 Silicone
A06-063 Changes in Properties and Structure of Polyethylene Terephthalate Film Under Vacuum Ultraviolet
A06-065 Effects of Atomic Oxygen on the Thermochromic Characteristics of VO2 Coating
A06-070 Degradation of Thermal Control Coatings Under Influence of Proton Irradiation
A06-148 Role of Water Vapor in Solar Array Arc Initiation: Dissociative Recombination Processes
A06-166 New Approach for the Evolution and Expansion of Space Debris Scenario
A06-069 Kinetics of Radiation Damage of Quartz Glass by Low-Energy Protons

Multidisciplinary Design Optimization

A06-168 Evaluation of Multidisciplinary Optimization Techniques Applied to a Reusable Launch Vehicle
A06-120 Utilization Rates of Geostationary Communication Satellites: Models of Loading Dynamics

Reliability, Maintainability, and Logistics Support

A06-085 On-Orbit Upgrade and Repair: The Hubble Space Telescope Example
A06-170 Stochastic Launcher-Satellite Coupled Dynamic Analysis

Research Facilities and Instrumentation

A06-160 Design of a Pulse-Facility Nozzle Using the Rotational Method Of Characteristics
A06-095 Performance Validation of Upgraded Eastern Range 50-Megahertz Doppler Radar Wind Profiler

Safety

A06-142 Effect of Pin-to-Case Electrostatic Discharge on Electroexplosive Zdeice Insulation Resistance

Sensor Systems

A06-095 Performance Validation of Upgraded Eastern Range 50-Megahertz Doppler Radar Wind Profiler

LAUNCH VEHICLE AND MISSILE (LV/M) TECHNOLOGY

Aerodynamics

A06-009 Simulation of Missiles with Grid Fins Using an Actuator Disk
A06-008 Computational Aerodynamic Analysis of Capsule Configurations Toward the Development of Reusable Rockets
A06-103 Aerodynamic Analysis of Grid-Fin Configurations at Supersonic Speeds
A06-016 Titan Launch Vehicle: Ground Test History
A06-157 Web-Based Computational Investigation of Aerothermodynamics of Atmospheric Entry Vehicles
A06-015 Multipoint Nose Shape Optimization of Space Launcher Using Response Surface Method
A06-130 Optimization of Viscous Waveriders Derived from Axisymmetric Power-Law Blunt Body Flows

Configuration Design

A06-015 Multipoint Nose Shape Optimization of Space Launcher Using Response Surface Method
A06-017 Comparison of Horizontally and Vertically Launched Airbreathing and Rocket Vehicles
A06-103 Aerodynamic Analysis of Grid-Fin Configurations at Supersonic Speeds
A06-008 Computational Aerodynamic Analysis of Capsule Configurations Toward the Development of Reusable Rockets

Launch Vehicle and Sounding Rocket Systems

A06-017 Comparison of Horizontally and Vertically Launched Airbreathing and Rocket Vehicles
A06-016 Titan Launch Vehicle: Ground Test History
A06-121 Apollo Lunar Orbit Rendezvous Architecture Decision Revisited
A06-115 Study of the Ignition Overpressure Suppression Technique by Water Addition
A06-080 Investigation of Two-Stage-to-Orbit Airbreathing Launch-Vehicle Configurations
A06-003 Fairing Noise Mitigation Using Passive Vibroacoustic Attenuation Devices

Mission Studies and Economics

A06-096 Low-Cost Launch of Payloads to Low Earth Orbit
A06-121 Apollo Lunar Orbit Rendezvous Architecture Decision Revisited
A06-033 Comparative Masses and Energies for Lunar and Martian Missions

Propulsion and Propellant Systems

A06-147 Vented Tank Resupply Experiment: Flight Test Results
A06-119 Launch Vehicle Propulsion Design with Multiple Selection Criteria
A06-121 Apollo Lunar Orbit Rendezvous Architecture Decision Revisited
A06-150 Studies on Internal Flow Choking in Dual-Thrust Motors
A06-080 Investigation of Two-Stage-to-Orbit Airbreathing Launch-Vehicle Configurations
A06-025 Fluid-Throat-Induced Shock Waves During the Ignition Transient of Solid Rockets

Simulation

A06-119 Launch Vehicle Propulsion Design with Multiple Selection Criteria
A06-020 Computational Analysis of High-Altitude Ionization Gauge Flight Measurements
A06-157 Web-Based Computational Investigation of Aerothermodynamics of Atmospheric Entry Vehicles
A06-170 Stochastic Launcher-Satellite Coupled Dynamic Analysis

Structural Design (Including Loads)

A06-003 Fairing Noise Mitigation Using Passive Vibroacoustic Attenuation Devices

Testing, Flight and Ground

A06-016 Titan Launch Vehicle: Ground Test History
A06-116 Investigation of Force-Limited Vibration for Reduction of Overtesting
A06-142 Effect of Pin-to-Case Electrostatic Discharge on Electroexplosive Zdeice Insulation Resistance

Thermal Protection Systems

A06-132 Catalytic and Radiative Behaviors of ZrB2-SiC Ultrahigh Temperature Ceramic Composites
A06-006 Influences of Electrical Conductivity of Wall on Magnetohydrodynamic Control of Aeroynamic Heating
A06-022 Simulation of Hypervelocity Impact Effects on Reinforced Carbon-Carbon
A06-102 Modeling Approach for Intumescing Charring Heatshield Materials

Trajectories and Tracking Systems

A06-157 Web-Based Computational Investigation of Aerothermodynamics of Atmospheric Entry Vehicles

Vibration

A06-010 Linearized Aeroelastic Analysis for a Launch Vehicle in Transonic Flight Conditions
A06-003 Fairing Noise Mitigation Using Passive Vibroacoustic Attenuation Devices

PROPULSION

Advanced Space Propulsion

A06-089 Efficiency of Electrodynamic Tether Thrusters
A06-090 Two-Dimensional Magnetohydrodynamic Simulation of a Magnetic Sail
A06-086 Transverse Vibration Analysis for Partly Wrinkled Membranes
A06-034 Simple Approach to Orbital Control Using Spinning Electrodynamic Tethers

Electric Propulsion

A06-018 Chemical and Solar-Electric-Propulsion Systems Analyses for Mars Sample Return Missions
A06-141 Solar Electric and Chemical Propulsion for a Titan Mission
A06-162 Flexible Piloted Mars Missions Using Continuous Electric Propulsion
A06-083 Propulsion Requirements for Drag-Free Operation of Spacecraft in Low Earth Orbit
A06-091 Micronewton Thruster Requirements for Earth-Orbiting Imaging Formations
A06-161 Application of Solar Electric Propulsion to a Comet Surface Sample Return Mission
A06-111 Maximizing Payload Mass Fractions of Spacecraft for Interplanetary Electric Propulsion Missions
A06-089 Efficiency of Electrodynamic Tether Thrusters

Hypersonic Propulsion

A06-017 Comparison of Horizontally and Vertically Launched Airbreathing and Rocket Vehicles

Micro Propulsion and Power

A06-133 Nozzle Plume Impingement on Spacecraft Surfaces: Effects of Surface Roughness

Nuclear Propulsion and Power

A06-163 Mission Design for the Innovative Interstellar Explorer Vision Mission

Photovoltaic Power

A06-148 Role of Water Vapor in Solar Array Arc Initiation: Dissociative Recombination Processes

Propulsion Hazards

A06-142 Effect of Pin-to-Case Electrostatic Discharge on Electroexplosive Zdeice Insulation Resistance
A06-176 Far-Field Spectral Analysis of a Space Shuttle Vernier Reaction Control System Firing

Ramjets and Scramjets

A06-080 Investigation of Two-Stage-to-Orbit Airbreathing Launch-Vehicle Configurations

Solar Power

A06-092 Deorbit Process Using Solar Radiation Force

Solid Rocket Motors

A06-165 Simulations of Solid-Propellant Rockets: Effects of Aluminum Droplet Size Distribution
A06-025 Fluid-Throat-Induced Shock Waves During the Ignition Transient of Solid Rockets
A06-150 Studies on Internal Flow Choking in Dual-Thrust Motors

REAL-TIME SYSTEMS

Systems Engineering

A06-072 Multilevel Radiation Protection of Partially Reconfigurable Field Programmable Gate Array Devices

SPACE TECHNOLOGY

Aerobraking Configurations/ Aerothermodynamics

A06-094 Aerodynamic Characteristics of Frustum-Shaped Elastic Membrane Aeroshells in Supersonic Flow
A06-042 Aeroheating Environments for a Mars Smart Lander
A06-155 Laminar-Turbulent Transition on Reentry Capsules and Planetary Probes
A06-036 Experimental Hypersonic Aerodynamic Characteristics of Mars Surveyor 2001 Precision Lander with Flap
A06-037 Supersonic Aerodynamic Characteristics of Proposed Mars '07 Smart Lander Configurations
A06-082 Trajectory and Attitude Simulation for Mars Aerocapture and Aerobraking
A06-035 Entry Configurations and Performance Comparisons for the Mars Smart Lander

Aerobraking Flight Mechanics

A06-082 Trajectory and Attitude Simulation for Mars Aerocapture and Aerobraking
A06-037 Supersonic Aerodynamic Characteristics of Proposed Mars '07 Smart Lander Configurations
A06-027 Investigation of Titan Aerogravity Assist for Capture into Orbit About Saturn

Global Positioning System

A06-180 Collision Risk Posed to the Global Positioning System by Disposed Upper Stages

Humans in Space/Life Support Systems, EVA

A06-179 Use of Genetic Algorithms and Transient Models for Life Support Systems Analysis
A06-014 Applying Analysis of International Space Station Crew-Time Utilization to Mission Design

International Space Station

A06-014 Applying Analysis of International Space Station Crew-Time Utilization to Mission Design
A06-076 Mitigation of Thruster Plume Erosion of International Space Station Solar Array Coatings
A06-021 Contamination and Damage to Filmed Microchannel Plates on the International Space Station
A06-077 Mitigating Potential Water Dump Particle Impact Damage to the International Space Station
A06-078 N-Nitrosodimethylamine Release from Fuel Oxidizer Reaction Product Contamined Extravehicular Activity Suits

Landers

A06-046 Mars Science Laboratory Parachute Simulation Model
A06-134 Mars Exploration Rover Six-Degree-of-Freedom Entry Trajectory Analysis
A06-037 Supersonic Aerodynamic Characteristics of Proposed Mars '07 Smart Lander Configurations
A06-038 Free-Flight Testing in Support of the Mars Science Laboratory Aerodynamics Database

Mission Design and Analysis

A06-014 Applying Analysis of International Space Station Crew-Time Utilization to Mission Design
A06-033 Comparative Masses and Energies for Lunar and Martian Missions
A06-060 Notable Two-Synodic-Period Earth-Mars Cycler
A06-024 Anomaly Trends for Long-Life Robotic Spacecraft
A06-179 Use of Genetic Algorithms and Transient Models for Life Support Systems Analysis
A06-026 Geometric Visibility of Ground Sites for Beacon/Relays on the Martian Moons
A06-013 Low-Thrust Trajectory Optimization Procedure for Gravity-Assist, Outer-Planet Missions
A06-162 Flexible Piloted Mars Missions Using Continuous Electric Propulsion
A06-141 Solar Electric and Chemical Propulsion for a Titan Mission
A06-018 Chemical and Solar-Electric-Propulsion Systems Analyses for Mars Sample Return Missions
A06-135 Design of the ARES Mars Airplane and Mission Architecture
A06-112 Sample Return from Mercury and Other Terrestrial Planets Using Solar Sail Propulsion
A06-127 Solar Polar Orbiter: A Solar Sail Technology Reference Study
A06-134 Mars Exploration Rover Six-Degree-of-Freedom Entry Trajectory Analysis
A06-110 Options for a Nondedicated Mission to Test the Pioneer Anomaly
A06-109 Preliminary Design of Multiple Gravity-Assist Trajectories
A06-083 Propulsion Requirements for Drag-Free Operation of Spacecraft in Low Earth Orbit
A06-039 Aerodynamic Database Development for Mars Smart Lander Vehicle Configurations
A06-052 Ground-to-Space Effective Atomic Oxygen Fluence Correlation for DC 93-500 Silicone
A06-118 Small Mission Design for Testing In-Orbit an Electrodynamic Tether Deorbiting System
A06-139 Trajectory Design and Maneuver Strategy for the MESSENGER Mission to Mercury
A06-082 Trajectory and Attitude Simulation for Mars Aerocapture and Aerobraking
A06-091 Micronewton Thruster Requirements for Earth-Orbiting Imaging Formations
A06-045 Arcjet Screening of Candidate Ablative Thermal Protection Materials for Mars Science Laboratory
A06-027 Investigation of Titan Aerogravity Assist for Capture into Orbit About Saturn
A06-096 Low-Cost Launch of Payloads to Low Earth Orbit
A06-154 Satellite Constellation Design Tradeoffs using Multiple-Objective Evolutionary Computation
A06-111 Maximizing Payload Mass Fractions of Spacecraft for Interplanetary Electric Propulsion Missions
A06-163 Mission Design for the Innovative Interstellar Explorer Vision Mission
A06-140 Preliminary Design of Low-Thrust Multiple Gravity-Assist Trajectories
A06-161 Application of Solar Electric Propulsion to a Comet Surface Sample Return Mission
A06-166 New Approach for the Evolution and Expansion of Space Debris Scenario
A06-126 History of Space Shuttle Rendezvous and Proximity Operations

Mission Trajectories (Earth and Interplanetary)

A06-161 Application of Solar Electric Propulsion to a Comet Surface Sample Return Mission
A06-163 Mission Design for the Innovative Interstellar Explorer Vision Mission
A06-027 Investigation of Titan Aerogravity Assist for Capture into Orbit About Saturn
A06-139 Trajectory Design and Maneuver Strategy for the MESSENGER Mission to Mercury
A06-137 Trajectories for Human Missions to Mars, Part II: Low-Thrust Transfers
A06-136 Trajectories for Human Missions to Mars, Part I: Impulsive Transfers
A06-127 Solar Polar Orbiter: A Solar Sail Technology Reference Study
A06-112 Sample Return from Mercury and Other Terrestrial Planets Using Solar Sail Propulsion
A06-141 Solar Electric and Chemical Propulsion for a Titan Mission
A06-162 Flexible Piloted Mars Missions Using Continuous Electric Propulsion
A06-013 Low-Thrust Trajectory Optimization Procedure for Gravity-Assist, Outer-Planet Missions
A06-030 Compound Solar Sail with Optical Properties: Models and Performance
A06-060 Notable Two-Synodic-Period Earth-Mars Cycler
A06-033 Comparative Masses and Energies for Lunar and Martian Missions

Space Experiments

A06-176 Far-Field Spectral Analysis of a Space Shuttle Vernier Reaction Control System Firing
A06-147 Vented Tank Resupply Experiment: Flight Test Results
A06-110 Options for a Nondedicated Mission to Test the Pioneer Anomaly
A06-118 Small Mission Design for Testing In-Orbit an Electrodynamic Tether Deorbiting System
A06-052 Ground-to-Space Effective Atomic Oxygen Fluence Correlation for DC 93-500 Silicone

A06-021 Contamination and Damage to Filmed Microchannel Plates on the International Space Station
A06-078 N-Nitrosodimethylamine Release from Fuel Oxidizer Reaction Product Contamined Extravehicular Activity Suits
A06-073 Electron Flux Formations at Middle Latitudes in the Surface Dose of Spacecraft

Space Systems

A06-077 Mitigating Potential Water Dump Particle Impact Damage to the International Space Station
A06-126 History of Space Shuttle Rendezvous and Proximity Operations
A06-175 Generator Regime of Self-Balanced Electrodynamic Bare Tethers
A06-118 Small Mission Design for Testing In-Orbit an Electrodynamic Tether Deorbiting System
A06-168 Evaluation of Multidisciplinary Optimization Techniques Applied to a Reusable Launch Vehicle
A06-149 Sapphire: Case Study for Student-Built Spacecraft

Spacecraft Test and Evaluation

A06-066 Radiation Effects of Protons and Electrons on Backfield Silicon Solar Cells
A06-117 Noise Control of Mock-Scale Chamber-Core Payload Fairing Using Integrated Acoustic Resonators
A06-116 Investigation of Force-Limited Vibration for Reduction of Overtesting
A06-064 Interaction Potential between Atomic Oxygen and Polymer Surfaces in Low Earth Orbit
A06-052 Ground-to-Space Effective Atomic Oxygen Fluence Correlation for DC 93-500 Silicone
A06-074 Degradation Testing of Spacecraft Materialsfor Long Flights in Low Earth Orbit
A06-001 Gossamer Spacecraft: Recent Trends in Design, Analysis, Experimentation, and Control
A06-107 Study on Ground Verification for Large Deployable Modular Structures

Spacecraft Thermal Management

A06-050 Experiments and Physical Modeling of Ultraviolet-Enhanced Contamination from Pure Contaminants
A06-065 Effects of Atomic Oxygen on the Thermochromic Characteristics of VO2 Coating
A06-177 Design and Modeling of a Thermally Regulated Communications Mode for Nano-spacecraft
A06-125 Afterbody Aeroheating Flight Data for Planetary Probe Thermal Protection System Design
A06-164 Stochastic Spacecraft Thermal Design Optimization with Low Computational Cost

STRUCTURAL MECHANICS AND MATERIALS

Aeroelasticity and Control

A06-181 Effects of Angle-of-Attack on the Aeroelastic Characteristics of a Wing with Freeplay
A06-010 Linearized Aeroelastic Analysis for a Launch Vehicle in Transonic Flight Conditions

Dynamic Model Analysis

A06-106 Dynamic Characteristic Formulations for Jointed Space Structures

Flexible and Active Structures

A06-094 Aerodynamic Characteristics of Frustum-Shaped Elastic Membrane Aeroshells in Supersonic Flow
A06-001 Gossamer Spacecraft: Recent Trends in Design, Analysis, Experimentation, and Control
A06-152 Numerical Simulation of Wrinkles in Space Inflatable Membrane Structures
A06-145 Distributed and Localized Active Vibration Isolation in Membrane Structures
A06-004 Vibration Isolator for Large Space Telescopes
A06-105 Analytical and Experimental Characterization of Gravity-Induced Deformations in Subscale Gossamer Structures
A06-108 Testing of Membrane Space Structure Shape Control Using Genetic Algorithm
A06-088 Equilibrium-to-Equilibrium Maneuvers of Flexible Electrodynamic Tethers in Equatorial Orbits

Materials Structural Properties

A06-144 Global/Local Analysis Strategy for Partly Wrinkled Membrane
A06-143 Micromechanical Models for Bending Behavior of Woven Composites
A06-063 Changes in Properties and Structure of Polyethylene Terephthalate Film Under Vacuum Ultraviolet
A06-055 Homogeneous Silica Formed by the Oxidation of Si(100) in Hyperthermal Atomic Oxygen
A06-059 Photostability of Coatings Based on TiO2 (Rutile) Doped with Potassium Peroxoborate
A06-071 Synergistic Effect of Protons and Electrons on Radiation Damage of Silicone Rubber
A06-067 Effect of Proton Irradiation on Mechanical Properties of Carbon/Epoxy Composites
A06-171 Structural Integrity of Flat Silicon Panels for Nanosatellites: Modeling and Testing

Structural Composite Materials

A06-067 Effect of Proton Irradiation on Mechanical Properties of Carbon/Epoxy Composites
A06-143 Micromechanical Models for Bending Behavior of Woven Composites

Structural Design

A06-107 Study on Ground Verification for Large Deployable Modular Structures
A06-152 Numerical Simulation of Wrinkles in Space Inflatable Membrane Structures
A06-171 Structural Integrity of Flat Silicon Panels for Nanosatellites: Modeling and Testing
A06-156 Space Structures on the Back of an Envelope: John Hedgepeth's Design Approach

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

A06-067 Effect of Proton Irradiation on Mechanical Properties of Carbon/Epoxy Composites
A06-075 On-Ground Simulated Space Factors Influence on Physical Properties of Spacecraft Materials
A06-131 Computer Simulation and its Experimental Verification of Atomic Oxygen Concentration

A06-063 Changes in Properties and Structure of Polyethylene Terephthalate Film Under Vacuum Ultraviolet
A06-053 Erosion of Kapton H® by Hyperthermal Atomic Oxygen
A06-070 Degradation of Thermal Control Coatings Under Influence of Proton Irradiation
A06-058 Surface Modification of Conductive and Nonconductive Paints for Space Durability Enhancement
A06-054 Two Thermodynamics-Based Approaches to Atomic Oxygen Sensing
A06-074 Degradation Testing of Spacecraft Materials for Long Flights in Low Earth Orbit

Structural Dynamics and Characterization

A06-086 Transverse Vibration Analysis for Partly Wrinkled Membranes
A06-056 Hyperthermal Collisions of O+(4S3/2) with Methane at 5 Electron Volts
A06-004 Vibration Isolator for Large Space Telescopes
A06-002 Deployment Study of a Self-Rigidizable Inflatable Boom
A06-106 Dynamic Characteristic Formulations for Jointed Space Structures
A06-170 Stochastic Launcher-Satellite Coupled Dynamic Analysis

Structural Finite Elements

A06-171 Structural Integrity of Flat Silicon Panels for Nanosatellites: Modeling and Testing
A06-169 Analysis of Gossamer Structures Using Assumed Strain Solid-Shell Finite Elements
A06-144 Global/Local Analysis Strategy for Partly Wrinkled Membrane
A06-086 Transverse Vibration Analysis for Partly Wrinkled Membranes

Structural Modeling

A06-152 Numerical Simulation of Wrinkles in Space Inflatable Membrane Structures
A06-105 Analytical and Experimental Characterization of Gravity-Induced Deformations in Subscale Gossamer Structures
A06-169 Analysis of Gossamer Structures Using Assumed Strain Solid-Shell Finite Elements
A06-106 Dynamic Characteristic Formulations for Jointed Space Structures

Thermal Effects

A06-057 Thermal Optical Properties of Plasma-Sprayed Mullite Coatings for Space Launch Vehicles

THERMOPHYSICS AND HEAT TRANSFER

Ablation, Pyrolysis, Thermal Decomposition and Degradation

A06-045 Arcjet Screening of Candidate Ablative Thermal Protection Materials for Mars Science Laboratory
A06-102 Modeling Approach for Intumescing Charring Heatshield Materials
A06-029 Formulation of the Ablation Thermal Problem in a Unified Form

Aerothermodynamics/Thermal Protection

A06-029 Formulation of the Ablation Thermal Problem in a Unified Form
A06-028 Experimental Study on Thermal Protection System by Opposing Jet in Supersonic Flow
A06-125 Afterbody Aeroheating Flight Data for Planetary Probe Thermal Protection System Design
A06-043 Mars Science Laboratory Experimental Aerothermodynamics with Effects of Cavities and Control Surfaces
A06-102 Modeling Approach for Intumescing Charring Heatshield Materials
A06-159 Boundary Layer/Streamline Surface Catalytic Heating Predictions on Space Shuttle Orbiter
A06-045 Arcjet Screening of Candidate Ablative Thermal Protection Materials for Mars Science Laboratory
A06-005 Finite Volume Numerical Methods for Aeroheating Rate Calculations from Infrared Thermographic Data
A06-044 Transition Due to Heat-Shield Cavities on a Mars Entry Vehicle
A06-097 Uncertainty Evaluation of Thermocouple Aeroheating Measurements for Hypersonic Wind-Tunnel Tests
A06-128 Numerical Study of Behavior of Outgas from Heat Shield of Solar Probe
A06-132 Catalytic and Radiative Behaviors of ZrB2-SiC Ultrahigh Temperature Ceramic Composites
A06-114 Effect of Computational Method on Discrete Roughness Correlations for Shuttle Orbiter
A06-155 Laminar-Turbulent Transition on Reentry Capsules and Planetary Probes

Computational Heat Transfer

A06-029 Formulation of the Ablation Thermal Problem in a Unified Form

Heat Conduction

A06-097 Uncertainty Evaluation of Thermocouple Aeroheating Measurements for Hypersonic Wind-Tunnel Tests

Nonintrusive Diagnostics

A06-005 Finite Volume Numerical Methods for Aeroheating Rate Calculations from Infrared Thermographic Data

Thermal Control

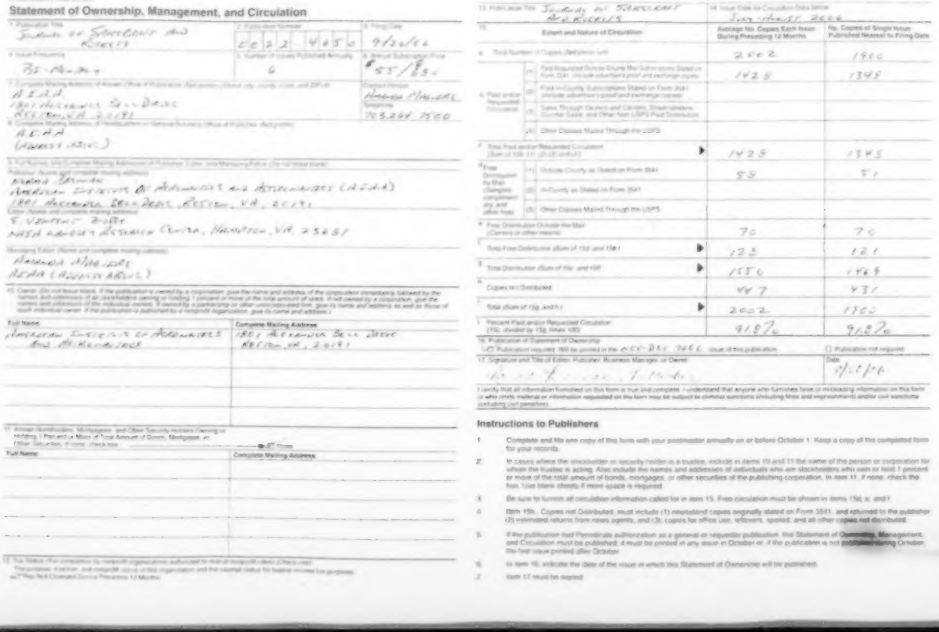
A06-057 Thermal Optical Properties of Plasma-Sprayed Mullite Coatings for Space Launch Vehicles
A06-059 Photostability of Coatings Based on TiO2 (Rutile) Doped with Potassium Peroxoborate
A06-093 Enhanced Heat Transfer Behaviors of New Heat Carrier for Spacecraft Thermal Management
A06-070 Degradation of Thermal Control Coatings Under Influence of Proton Irradiation
A06-065 Effects of Atomic Oxygen on the Thermochromic Characteristics of VO2 Coating

Thermal Modeling and Analysis

A06-129 Laser Window Design for the Army Hypersonic Compact Kinetic Energy Missile
A06-005 Finite Volume Numerical Methods for Aeroheating Rate Calculations from Infrared Thermographic Data
A06-164 Stochastic Spacecraft Thermal Design Optimization with Low Computational Cost

Thermophysical Properties

A06-057 Thermal Optical Properties of Plasma-Sprayed Mullite Coatings for Space Launch Vehicles
A06-093 Enhanced Heat Transfer Behaviors of New Heat Carrier for Spacecraft Thermal Management
A06-132 Catalytic and Radiative Behaviors of ZrB2-SiC Ultrahigh Temperature Ceramic Composites



Statement of Ownership, Management, and Circulation

Instructions to Publishers

1. Complete and file one copy of this form with your postmaster annually on or before October 1. Keep a copy of the completed form for your records.
2. In cases where the stockholder or security holder is a trustee, include in items 10 and 11 the name of the person or corporation for whom the trustee is acting. Also include the names and addresses of individuals who are stockholders who own or hold 1 percent or more of the total amount of bonds, mortgages, or other securities of the publishing corporation. In item 11, if none, check the box. Use blank sheets if more space is required.
3. Be sure to furnish all circulation information called for in item 15. Free circulation must be shown in items 15d, e, and f.
4. Item 15h., Copies not Distributed, must include (1) newsstand copies originally stated on Form 3541, and returned to the publisher (2) estimated returns from news agents, and (3), copies for office use, leftovers, spoiled, and all other copies not distributed.
5. If the publication had Periodicals authorization as a general or requester publication, this Statement of Ownership, Management, and Circulation must be published; it must be printed in any issue in October or, if the publication is not published during October, the first issue printed after October.
6. In item 16, indicate the date of the issue in which this Statement of Ownership will be published.
7. Item 17 must be signed.

Chronological Index

A06-001 Gossamer Spacecraft: Recent Trends in Design, Analysis, Experimentation, and Control. Eric J. Ruggiero and Daniel J. Inman, *Virginia Polytechnic Institute and State University* (**43**, 1, p. 10) Survey Paper

A06-002 Deployment Study of a Self-Rigidizable Inflatable Boom. Houfei Fang and Michael Lou, *Jet Propulsion Laboratory, California Institute of Technology*; and John Hah, *Hah Hah & Associates, Inc.* (**43**, 1, p. 25) Article

A06-003 Fairing Noise Mitigation Using Passive Vibroacoustic Attenuation Devices. Steven A. Lane, *U. S. Air Force Research Laboratory*; Steven Griffin and Robert E. Richard, *Boeing-SVS* (**43**, 1, p. 31) Article

A06-004 Vibration Isolator for Large Space Telescopes. Allen J. Bronowicki, *Northrop Grumman Space Technology* (**43**, 1, p. 45) Article based on AIAA Paper 2004-1903

A06-005 Finite Volume Numerical Methods for Aeroheating Rate Calculations from Infrared Thermographic Data. Kamran Daryabeigi, Scott A. Berry, Thomas J. Horvath, and Robert J. Nowak, *NASA Langley Research Center* (**43**, 1, p. 54) Article based on AIAA Paper 2003-3634

A06-006 Influences of Electrical Conductivity of Wall on Magnetohydrodynamic Control of Aeroynamic Heating. Takayasu Fujino, *University of Tsukuba, Japan*; Hiroyuki Sugita, Masahito Mizuno, and Ikkoh Funaki, *Japan Aerospace Exploration Agency, Japan*; and Motoo Ishikawa, *University of Tsukuba, Japan* (**43**, 1, p. 63) Article

A06-007 Mach 6 Boundary-Layer Stability Experiments on Sharp and Blunt Cones. Anatoly A. Maslov, Alexander N. Shipyluk, Dmitry A. Bountin, and Andrey A. Sidorenko, *Russian Academy of Sciences, Russia* (**43**, 1, p. 71) Article

A06-008 Computational Aerodynamic Analysis of Capsule Configurations Toward the Development of Reusable Rockets. Keiichiro Fujimoto, *University of Tokyo, Japan*; and Kozo Fujii, *Japan Aerospace Exploration Agency, Japan* (**43**, 1, p. 77) Article based on AIAA Paper 2003-0912

A06-009 Simulation of Missiles with Grid Fins Using an Actuator Disk. P. Reynier, J. M. Longo, and E. Schulein, *DLR, German Aerospace Center, Germany* (**43**, 1, p. 84) Article

A06-010 Linearized Aeroelastic Analysis for a Launch Vehicle in Transonic Flight Conditions. Francesco Capri and Franco Mastroddi, *University of Rome "La Sapienza", Italy*; and Antonio Pizzicaroli, *AVIO S.p.A., Italy* (**43**, 1, p. 92) Article

A06-011 Hyper-X Post-Flight Trajectory Reconstruction. Christopher D. Karlgaard, *Analytical Mechanics Associates, Inc.*; Paul V. Tartabini, *NASA Langley Research Center*; Robert C. Blanchard and Michael Kirsch, *George Washington University*; and Matthew D. Toniolo, *Analytical Mechanics Associates, Inc.* (**43**, 1, p. 105) Article based on AIAA Paper 2004-4829

A06-012 Optimal Radially Accelerated Interplanetary Trajectories. Hiroshi Yamakawa, *Japan Aerospace Exploration Agency, Japan* (**43**, 1, p. 116) Article

A06-013 Low-Thrust Trajectory Optimization Procedure for Gravity-Assist, Outer-Planet Missions. Byoungsam Woo and Victoria L. Coverstone, *University of Illinois at Urbana-Champaign*; and Michael Cupples, *Science Applications International Corporation* (**43**, 1, p. 121) Article based on AIAA Paper 2004-5397

A06-014 Applying Analysis of International Space Station Crew-Time Utilization to Mission Design. James F. Russell and David M. Klaus, *University of Colorado*; and Todd J. Mosher, *Utah State University* (**43**, 1, p. 130) Article

A06-015 Multipoint Nose Shape Optimization of Space Launcher Using Response Surface Method. Jae-Woo Lee, Byung-Young Min, and Yung-Hwan Byun, *Konkuk University, Republic of Korea*; and Sang-Jin Kim, *Agency for Defense Development, Republic of Korea* (**43**, 1, p. 137) Article based on AIAA Paper 2002-0106

A06-016 Titan Launch Vehicle: Ground Test History. Tim L. Brower, *Oregon Institute of Technology* (**43**, 1, p. 147) Article based on AIAA Paper 2004-2488

A06-017 Comparison of Horizontally and Vertically Launched Airbreathing and Rocket Vehicles. Adam F. Dissel and Ajay P. Kothari, *Astrox Corporation*; and Mark J. Lewis, *University of Maryland* (**43**, 1, p. 161) Article based on AIAA Paper 2004-3988

A06-018 Chemical and Solar-Electric-Propulsion Systems Analyses for Mars Sample Return Missions. Benjamin B. Donahue, *Boeing Phantom Works*; Shaun E. Green, *Science Applications International Corporation*; and Victoria L. Coverstone, *University of Illinois at Urbana-Champaign* (**43**, 1, p. 170) Article based on AIAA Paper 2004-3807

A06-019 Spatial and Temporal Correlation of Spacecraft Surface Charging in Geosynchronous Orbit. H. Koons and J. Mazur, *The Aerospace Corporation*; A. Lopatin, *Intelsat*; D. Pitchford, *New Skies Satellites N.V., The Netherlands*; A. Bogorad and R. Herschitz, *Lockheed Martin Commercial Space Systems* (**43**, 1, p. 178) Article

A06-020 Computational Analysis of High-Altitude Ionization Gauge Flight Measurements. Quanhua Sun, Chunpei Cai, and Iain D. Boyd, *University of Michigan*; James H. Clemmons and James H. Hecht, *The Aerospace Corporation* (**43**, 1, p. 186) Article based on AIAA Paper 2004-2686

A06-021 Contamination and Damage to Filmed Microchannel Plates on the International Space Station. J. D. Carpenter, T. J. Stevenson, and G. W. Fraser, *University of Leicester, England, U.K.* (**43**, 1, p. 194) Article

A06-022 Simulation of Hypervelocity Impact Effects on Reinforced Carbon-Carbon. Young-Keun Park and Eric P. Fahrenthold, *University of Texas at Austin* (**43**, 1, p. 200) Article

A06-023 To Reduce or to Extend a Spacecraft Design Lifetime?. Joseph H. Saleh, Juan-Pablo Torres-Padilla, Daniel E. Hastings, and Dava J. Newman, *Massachusetts Institute of Technology* (**43**, 1, p. 207) Article based on AIAA Paper 2004-3103

A06-024 Anomaly Trends for Long-Life Robotic Spacecraft. Nelson W. Green, Alan R. Hoffman, and Henry B. Garrett, *Jet Propulsion Laboratory, California Institute of Technology* (**43**, 1, p. 218) Article

A06-025 Fluid-Throat-Induced Shock Waves During the Ignition Transient of Solid Rockets. Sanal Kumar V.R. and Heuy-Dong Kim, *Andong National University, South Korea*; Raghunandan B.N. and Sameen A. *Indian Institute of Science, India*; Setoguchi T. *Saga University, Japan*; and Raghunathan S, *Queen's University of Belfast, Northern Ireland, U.K.* (**43**, 1, p. 225) Technical Note based on AIAA Paper 2005-4147

A06-026 Geometric Visibility of Ground Sites for Beacon/Relays on the Martian Moons. William J. Chadwick, David B. Spencer, and Robert G. Melton, *Pennsylvania State University* (**43**, 1, p. 228) Technical Note

A06-027 Investigation of Titan Aerogravity Assist for Capture into Orbit About Saturn. James E. Lyne and Philip Ramsey, *University of Tennessee* (**43**, 1, p. 231) Technical Note based on AIAA Paper 03-644

A06-028 Experimental Study on Thermal Protection System by Opposing Jet in Supersonic Flow. Kentaro Hayashi, Shigeru Aso, and Yasuhiro Tani, *Kyushu University, Japan* (**43**, 1, p. 233) Article based on AIAA Paper 2003-4041

A06-029 Formulation of the Ablation Thermal Problem in a Unified Form. Francisco Augusto A. Gomes, João Batista C. Silva, and Antonio J. Diniz, *State University of São Paulo, Brazil* (**43**, 1, p. 236) Technical Note

A06-030 Compound Solar Sail with Optical Properties: Models and Performance. Giovanni Mengali and Alessandro A. Quarta, *University of Pisa, Italy* (**43**, 1, p. 239) Technical Note

A06-031 Lower Hybrid Instability in Gas-Dust Formations from Rocket Exhaust in the Ionosphere. M. Rosenberg, *University of San Diego*; and G. Sorasio, *Instituto Superior Técnico, Portugal* (**43**, 1, p. 245) Technical Note

A06-032 Radar Evaluation of Optical Cloud Constraints to Space Launch Operations. Francis J. Merceret, *NASA Kennedy Space Center*; David A. Short, *ENSCO, Inc.*; and Jennifer G. Ward, *NASA Kennedy Space Center* (**43**, 1, p. 248) Technical Note

A06-033 Comparative Masses and Energies for Lunar and Martian Missions. R. E. Terry, T. Hill, and R. McCartney, *Mars Society* (**43**, 1, p. 251) Technical Note

A06-034 Simple Approach to Orbital Control Using Spinning Electrodynamic Tethers. Paul Williams, *Royal Melbourne Institute of Technology, Australia* (**43**, 1, p. 253) Technical Note

A06-035 Entry Configurations and Performance Comparisons for the Mars Smart Lander. Mary Kae Lockwood and Richard W. Powell, *NASA Langley Research Center*; Kenneth Sutton, *National Institute of Aerospace*; Ramadas K. Prabhu, *Lockheed Martin Engineering and Sciences Company*; Claude A. Graves, Chirold D. Epp, and Gilbert L. Carman, *NASA Johnson Space Center* (**43**, 2, p. 258) Article

A06-036 Experimental Hypersonic Aerodynamic Characteristics of Mars Surveyor 2001 Precision Lander with Flap. Thomas J. Horvath, Tod F. O'Connell, F. McNeil Cheatwood, Ramadas K. Prabhu, and Stephen J. Alter, *NASA Langley Research Center* (**43**, 2, p. 270) Article based on AIAA Paper 2002-4408

A06-037 Supersonic Aerodynamic Characteristics of Proposed Mars '07 Smart Lander Configurations. Kelly J. Murphy, Thomas J. Horvath, and Gary E. Erickson, *NASA Langley Research Center*; and Joseph M. Green, *Mississippi State University* (**43**, 2, p. 282) Article

A06-038 Free-Flight Testing in Support of the Mars Science Laboratory Aerodynamics Database. Jeff Brown, Leslie Yates, David Bogdanoff, and Gary Chapman, *Eloret Corporation*; Mark Loomis and Tim Tam, *NASA Ames Research Center* (**43**, 2, p. 293) Article

A06-039 Aerodynamic Database Development for Mars Smart Lander Vehicle Configurations. Glenn Bobskill and Paresh C. Parikh, *NASA Langley Research Center*; Ramada K. Prabhu, *Lockheed Martin Engineering and Sciences Company*; and Erik D. Tyler, *Swales Aerospace* (**43**, 2, p. 303) Article

A06-040 Mars Science Laboratory Simulations for Entry, Descent, and Landing. Scott A. Striepe, D. W. Way, and A. M. Dwyer, *NASA Langley Research Center*; and J. Balaram, *Jet Propulsion Laboratory, California Institute of Technology* (**43**, 2, p. 311) Article based on AIAA Paper 2002-4412

A06-041 Entry Vehicle Control System Design for the Mars Science Laboratory. Philip C. Calhoun and Eric M. Queen, *NASA Langley Research Center* (**43**, 2, p. 324) Article based on AIAA Paper 2002-4504

A06-042 Aeroheating Environments for a Mars Smart Lander. Karl Edquist, Derek S. Liechty, Brian R. Hollis, and Stephen J. Alter, *NASA Langley Research Center*; and Mark P. Loomis, *NASA Ames Research Center* (**43**, 2, p. 330) Article

A06-043 Mars Science Laboratory Experimental Aerothermodynamics with Effects of Cavities and Control Surfaces. Derek S. Liechty, Brian R. Hollis, and Karl T. Edquist, *NASA Langley Research Center* (**43**, 2, p. 340) Article

A06-044 Transition Due to Heat-Shield Cavities on a Mars Entry Vehicle. Brian R. Hollis and Derek Liechty, *NASA Langley Research Center* (**43**, 2, p. 354) Article

A06-045 Arcjet Screening of Candidate Ablative Thermal Protection Materials for Mars Science Laboratory. Bernard Laub and Susan White, *NASA Ames Research Center* (**43**, 2, p. 367) Article based on AIAA Paper 2002-4507

A06-046 Mars Science Laboratory Parachute Simulation Model. Eric M. Queen, *NASA Langley Research Center*; and Behzad Raiszadeh, *NASA Langley Research Center* (**43**, 2, p. 374) Article

A06-047 Guidance and Control Design for Hazard Avoidance and Safe Landing on Mars. Edward C. Wong and Gurkirpal Singh, *Jet Propulsion Laboratory, California Institute of Technology*; and James P. Masciarelli, *NASA Johnson Space Center* (**43**, 2, p. 378) Article

A06-048 Effects of Vacuum Ultraviolet Radiation on DC93-500 Silicone. Joyce A. Dever, Bruce A. Banks, *NASA John H. Glenn Research Center at Lewis Field*; and Li Yan, *University of Nebraska at Lincoln* (**43**, 2, p. 386) Article

A06-049 Evaluation of Protective Silicone/Siloxane Coatings in Simulated Low-Earth-Orbit Environment. David P. Dworak, *University of Akron*; Bruce A. Banks, *NASA John H. Glenn Research Center at Lewis Field*; Christina A. Karniotis, *QSS Group, Inc.*; and Mark D. Soucek, *University of Akron* (**43**, 2, p. 393) Article

A06-050 Experiments and Physical Modeling of Ultraviolet-Enhanced Contamination from Pure Contaminants. Alexandre Pereira and Jean-François Roussel, *ONERA, France*; Marc Van Eesbeek and Olivier Schmeitzky, *ESA, The Netherlands*; and Delphine Faye, *Centre National d'Etudes Spatiales, France* (**43**, 2, p. 402) Article

A06-051 Influence of UV Radiation on Outgassing of Polymeric Composites. R. H. Khassanchine, A. V. Grigorevskiy, and A. N. Galygin, *Joint-Stock Company "Kompozit", Russia* (**43**, 2, p. 410) Article

A06-052 Ground-to-Space Effective Atomic Oxygen Fluence Correlation for DC 93-500 Silicone. Kim K. de Groh and Bruce A. Banks, *NASA John H. Glenn Research Center at Lewis Field*; and David Ma, *Lockheed Martin Space Systems* (**43**, 2, p. 414) Article

A06-053 Erosion of Kapton H® by Hyperthermal Atomic Oxygen. Deanna M. Buczala, Amy L. Brunsvold, and Timothy K. Minton, *Montana State University* (**43**, 2, p. 421) Article

A06-054 Two Thermodynamics-Based Approaches to Atomic Oxygen Sensing. Mikhail L. Zheludkevich and Kiryl A. Yasakau, *University of Aveiro, Portugal*; Anatoly G. Gusakov, Anatoly G. Voropaev, and Alim A. Vecher, *Belarusian State University, Belarus* (**43**, 2, p. 426) Article

A06-055 Homogeneous Silica Formed by the Oxidation of Si(100) in Hyperthermal Atomic Oxygen. Maja Kisa, Long Li, and Judith Yang, *University of Pittsburgh*; Timothy K. Minton, *Montana State University*; William G. Stratton and Paul Voyles, *University of Wisconsin-Madison*; Xidong Chen, *Cedarville University*; Klaus van Benthem and Steve J. Pennycook, *Oak Ridge National Laboratory* (**43**, 2, p. 431) Article

A06-056 Hyperthermal Collisions of O+(4S3/2) with Methane at 5 Electron Volts. Lipeng Sun and George C. Schatz, *Northwestern University* (**43**, 2, p. 436) Article

A06-057 Thermal Optical Properties of Plasma-Sprayed Mullite Coatings for Space Launch Vehicles. Severin Seifert, *Technische Universitat Bergakademie Freiberg, Germany*; Jacob I. Kleiman, *Integrity Testing Laboratory Inc., Canada*; and Robert B. Heimann, *Oceangate Consulting, Germany* (**43**, 2, p. 439) Article

A06-058 Surface Modification of Conductive and Nonconductive Paints for Space Durability Enhancement. J. I. Kleiman, Y. Gudimenko, R. H. Ng, and Z. A. Iskanderova, *Integrity Testing Laboratory, Inc., Canada*; A. Grigorevski, *Public Joint Stock Company "Composite", Russia*; L. Kiseleva, *Public Joint Stock Company, Russia*; D. Edwards and M. Finckenor, *NASA Marshall Space Flight Center* (**43**, 2, p. 443) Article

A06-059 Photostability of Coatings Based on TiO2 (Rutile) Doped with Potassium Peroxoborate. Mikhail M. Mikhailov and Aleksey N. Sokolovskii, *Tomsk State University of Control Systems and Radio Electronics, Russia* (**43**, 2, p. 451) Article

A06-060 Notable Two-Synodic-Period Earth-Mars Cycler. T. Troy McConaghy, Damon F. Landau, Chit Hong Yam, and James M. Longuski, *Purdue University* (**43**, 2, p. 456) Article

A06-061 Low-Thrust Spacecraft Formation Keeping. Pierre Vignal and Henry Pernicka, *University of Missouri-Rolla* (**43**, 2, p. 466) Article based on AIAA Paper 04-296

A06-062 Libration Control of Tethered Satellites in Elliptical Orbits. Paul Williams, *Royal Melbourne Institute of Technology University, Australia* (**43**, 2, p. 476) Technical Note

A06-063 Changes in Properties and Structure of Polyethylene Terephthalate Film Under Vacuum Ultraviolet. Guirong Peng, Dezhuang Yang, and Shiyu He, *Harbin Institute of Technology, China (PRC)* (**43**, 3, p. 482) Article

A06-064 Interaction Potential between Atomic Oxygen and Polymer Surfaces in Low Earth Orbit. Laiwen Chen and Chun-Hian Lee, *Beijing University of Aeronautics and Astronautics, China (PRC)* (**43**, 3, p. 487) Article

A06-065 Effects of Atomic Oxygen on the Thermochromic Characteristics of VO2 Coating. X. Jiang, *Canadian Space Agency, Canada*; M. Soltani, *University of Quebec, Canada*; E. Haddad, *MPB Technologies, Inc., Canada*; R. Kruzelecky, *MPB Technologies Inc., Canada*; D. Nikanpour, *Canadian Space Agency, Canada*; and M. Chaker, *University of Quebec, Canada* (**43**, 3, p. 497) Article

A06-066 Radiation Effects of Protons and Electrons on Backfield Silicon Solar Cells. Yiyong Wu, Zhengyu Hu, Jingdong Xiao, Hongbin Geng, Shiyu He, Dezhuang Yang, and Xibin Cao, *Harbin Institute of Technology, China (PRC)* (**43**, 3, p. 501) Article

A06-067 Effect of Proton Irradiation on Mechanical Properties of Carbon/Epoxy Composites. Gao Yu, *Harbin Institute of Technology, China (PRC)*; Yang De-zhuang, Xiao Jing-dong, and He Shi-Yu, *Harbin Institute of Technology*; and Lixing Zhi-jun, *China Electronic Science and Technology Groups, Inc.* (**43**, 3, p. 505) Article

A06-068 Simulation of Electron Radiation on Outgassing of Spacecraft Materials. R. H. Khassanchine and A. N. Timofeev, *Joint-Stock Company "Kompozit", Russia*; A.N. Galygin, *JJoint-Stock Company "Kompozit", Russia*; and V. I. Kostiuk, *Joint-Stock Company "Kompozit", Russia* (**43**, 3, p. 509) Article

A06-069 Kinetics of Radiation Damage of Quartz Glass by Low-Energy Protons. Qiang Wei, Hai Liu, Shiyu He, and Dezhuang Yang, *Harbin Institute of Technology, China (PRC)* (**43**, 3, p. 514) Article

A06-070 Degradation of Thermal Control Coatings Under Influence of Proton Irradiation. L.S. Novikov and G. G. Solovyev, *Moscow State University, Russia*; V. N. Vasil'ev, *Central Research Institute of Machine Building, Russia*; A. V. Grigorevskiy, *Corporation "Kompozit", Russia*; and L. V. Kisileva, *Corporation, Russia* (**43**, 3, p. 518) Article based on AIAA Paper A-9

A06-071 Synergistic Effect of Protons and Electrons on Radiation Damage of Silicone Rubber. Chengmin Wang, *Shanghai Kiaotong University, China (PRC)*; Lixing Zhang, Shiyu He, and Qiang Wei, *Harbin Institute of Technology, China (PRC)* (**43**, 3, p. 520) Article

A06-072 Multilevel Radiation Protection of Partially Reconfigurable Field Programmable Gate Array Devices. Lev Kirischian, Vadim Geurkov, Irina Terterian, and Valeri Kirischian, *Ryerson University, Canada*; and Jacob Kleiman, *Integrity Testing Laboratory, Inc., Canada* (**43**, 3, p. 523) Article

A06-073 Electron Flux Formations at Middle Latitudes in the Surface Dose of Spacecraft. O.R. Grigoryan, V. N. Sheveleva, and L. S. Novikov, *Lomonosov Moscow State University, Russia*; V. L. Petrov, *Lomonosov Moscow State University, China (PRC)*; L. Kudela, *Slovak Academy of Science, Russia*; and I. V. Tchurilo, *Rocket Space Corporation, Russia* (**43**, 3, p. 530) Article based on AIAA Paper POA-2

A06-074 Degradation Testing of Spacecraft Materials for Long Flights in Low Earth Orbit. L.S. Novikov and V. N. Chernik, *Moscow State University, Russia*; S. F. Naumov, S. P. Sokolova, T. I. Gerasimova, and A. O. Kurilyonok, *Korolev Rocket and Space Corporation, Russia*; and T. N. Smirnova, *Khrunichev State Space Scientific Production Center, Russia* (**43**, 3, p. 534) Article based on AIAA Paper B-4

A06-075 On-Ground Simulated Space Factors Influence on Physical Properties of Spacecraft Materials. Roland V. Gavrylov and Yuriy O. Pokhyl, *National Academy of Sciences of the Ukraine, Ukraine* (**43**, 3, p. 539) Article

A06-076 Mitigation of Thruster Plume Erosion of International Space Station Solar Array Coatings. Courtney A. Pankop, John W. Alred, and Paul A. Boeder, *The Boeing Company* (**43**, 3, p. 545) Article

A06-077 Mitigating Potential Water Dump Particle Impact Damage to the International Space Station. William Schmidl, Ron Mikatarian, and James Visentine, *Boeing* (**43**, 3, p. 551) Article

A06-078 N-Nitrosodimethylamine Release from Fuel Oxidizer Reaction Product Contamined Extravehicular Activity Suits. William Schmidl and Ron Mikatarian, *The Boeing Company*; Chiu-Wing Lam, *Wyle Laboratories*; Bill West, *Hamilton Sundstrand*; Vanessa Buchanan and Louis Dee, *Honeywell Technology Solutions*; David Baker, *NASA White Sands Test Facility*; and Steve Koontz, *NASA Johnson Space Center* (**43**, 3, p. 557) Article

A06-079 Damage Features of Zr41Ti14Cu12.5Ni10Be22.5 Bulk Metallic Glass Impacted by Hypervelocity Projectiles. C. Yang, *South China University of Technology, China (PRC)*; W. K. Wang, R. P. Liu, L. Liu, Xinyu Zhang, and L. X. Li, *Yanshan University, China (PRC)* (**43**, 3, p. 565) Article

A06-080 Investigation of Two-Stage-to-Orbit Airbreathing Launch-Vehicle Configurations. Adam F. Dissel and Ajay P. Kothari, *Astrox Corporation*; and Mark J. Lewis, *University of Maryland* (**43**, 3, p. 568) Article based on AIAA Paper 2005-3244

A06-081 Numerical and Experimental Investigation of PRORA USV Subsonic and Transonic Aerodynamics. R. Savino and D. Paterna, *University of Naples, Italy*; and M. Serpico, *Italian Aerospace Research Center, Italy* (**43**, 3, p. 575) Article

A06-082 Trajectory and Attitude Simulation for Mars Aerocapture and Aerobraking. Mrinal Kumar, *Texas A&M University*; and Ashish Tewari, *Indian Institute of Technology Kanpur, India* (**43**, 3, p. 585) Article

A06-083 Propulsion Requirements for Drag-Free Operation of Spacecraft in Low Earth Orbit. Brian St. Rock, John J. Blandino, and Michael Demetriou, *Worcester Polytechnic Institute* (**43**, 3, p. 594) Article

A06-084 Steering Moments Creation in Supersonic Flow by Off-Axis Plasma Heat Addition. I G. Girgis, M N. Shneider, S O. Macheret, G L. Brown, and R B. Miles, *Princeton University* (**43**, 3, p. 607) Article based on AIAA Paper 2002-0129

A06-085 On-Orbit Upgrade and Repair: The Hubble Space Telescope Example. Daniel E. Hastings and Carole Joppin, *Massachusetts Institute of Technology* (**43**, 3, p. 614) Article based on AIAA Paper 2004-6052

A06-086 Transverse Vibration Analysis for Partly Wrinkled Membranes. N. M. A. Hossain and C. H. Jenkins, *South Dakota School of Mines and Technology*; K. Woo, *Chungbuk National University, Republic of Korea*, and H. Igawa, *Japan Aerospace Exploration Agency, Japan* (**43**, 3, p. 626) Article

A06-087 Optimal Deployment/Retrieval of a Tethered Formation Spinning in the Orbital Plane. Paul Williams, *Royal Melbourne Institute of Technology University, Australia* (**43**, 3, p. 638) Article

A06-088 Equilibrium-to-Equilibrium Maneuvers of Flexible Electrodynamic Tethers in Equatorial Orbits. Kalyan K. Mankala and Sunil K. Agrawal, *University of Delaware* (**43**, 3, p. 651) Article based on AIAA Paper 2004-5342

A06-089 Efficiency of Electrodynamic Tether Thrusters. J. R. Sanmartin, *Universidad Politecnica de Madrid, Spain*; R. D. Estes and E. C. Lorenzini, *Harvard-Smithsonian Center for Astrophysics*; and S. A. Elaskar, *Universidad Nacional de Cordoba, Argentina* (**43**, 3, p. 659) Article

A06-090 Two-Dimensional Magnetohydrodynamic Simulation of a Magnetic Sail. Hiroyuki Nishida, *University of Tokyo, Japan*; Hiroyuki Ogawa, Ikkoh Funaki, Kazuhisa Fujita, and Hiroshi Yamakawa, *Japan Aerospace Exploration Agency, Japan*; and Yoshinori Nakayama, *National Defense Academy, Japan* (**43**, 3, p. 667) Article

A06-091 Micronewton Thruster Requirements for Earth-Orbiting Imaging Formations. J. J. Blandino and B. St. Rock, *Worcester Polytechnic Institute* (**43**, 3, p. 673) Article

A06-092 Deorbit Process Using Solar Radiation Force. J. Angel Borja and Dionisio Tun, *Satelites Mexicanos, Mexico* (**43**, 3, p. 685) Technical Note

A06-093 Enhanced Heat Transfer Behaviors of New Heat Carrier for Spacecraft Thermal Management. Qiang Li and Yimin Xuan, *Nanjing University of Science and Technology, China (PRC)* (**43**, 3, p. 687) Technical Note

A06-094 Aerodynamic Characteristics of Frustum-Shaped Elastic Membrane Aeroshells in Supersonic Flow. Kazuhiko Yamada and Kojiro Suzuki, *University of Tokyo, Japan*; and Motoyuki Hongo, *Japan Aerospace Exploration Agency, Japan* (**43**, 3, p. 690) Technical Note based on AIAA Paper 2003-3924

A06-095 Performance Validation of Upgraded Eastern Range 50-Megahertz Doppler Radar Wind Profiler. Donald J. Pinter, *Computer Sciences Raytheon*; Frank J. Merceret, *NASA Kennedy Space Center*; and Clay V. Hatley, *ITT Industries, Patrick Air Force Base* (**43**, 3, p. 693) Technical Note

A06-096 Low-Cost Launch of Payloads to Low Earth Orbit. Rodney L. Burton, Kevin Brown, and Anthony Jacobi, *University of Illinois at Urbana-Champaign* (**43**, 3, p. 696) Technical Note based on AIAA Paper 2005-2717

A06-097 Uncertainty Evaluation of Thermocouple Aeroheating Measurements for Hypersonic Wind-Tunnel Tests. Shigeru Kuchi-Ishi, *Japan Aerospace Exploration Agency, Japan* (**43**, 3, p. 698) Technical Note

A06-098 Extending the Jump Analysis for Aerodynamic Asymmetry. G. R. Cooper, *U. S. Army Research Laboratory* (**43**, 3, p. 700) Technical Note based on AIAA Paper 2004-5057

A06-099 Review on Dynamics and Control of Nonelectrodynamic Tethered Satellite Systems. K. D. Kumar, *Korea Adanced Institute of Science and Technology, Republic of Korea* (**43**, 4, p. 705) Survey Paper

A06-100 Aerodynamic Stability of Reentry Heat Shield Shapes for a Crew Exploration Vehicle. Joshua E. Johnson, Ryan P. Starkey, and Mark J. Lewis, *University of Maryland* (**43**, 4, p. 721) Article based on AIAA Paper 2005-4112

A06-101 Experiment of the Two-Dimensional Roughness Effect on Hypersonic Boundary-Layer Transition. Keisuke Fujii, *Japan Aerospace Exploration Agency, Japan* (**43**, 4, p. 731) Article based on AIAA Paper 2005-0891

A06-102 Modeling Approach for Intumescing Charring Heatshield Materials. Gerald W. Russell, *U.S. Army Aviation and Missile Research Development and Engineering Center*; and Forrest Strobel, *ITT Industries* (**43**, 4, p. 739) Article

A06-103 Aerodynamic Analysis of Grid-Fin Configurations at Supersonic Speeds. P. Theerthamalai and M. Nagarathinam, *Defence Research and Development Laboratory, India* (**43**, 4, p. 750) Article

A06-104 Roll-Rate Stability Limits of Unguided Rockets with Wraparound Fins. Gabriel Liaño and Jesús Morote, *National Institute of Aerospace Technology, Spain* (**43**, 4, p. 757) Article based on AIAA Paper 2005-436

A06-105 Analytical and Experimental Characterization of Gravity-Induced Deformations in Subscale Gossamer Structures. John D. Johnston, *NASA Goddard Space Flight Center*; Joseph R. Blandino, *James Madison University*; and Kiley C. McEvoy, *Dartmouth College* (**43**, 4, p. 762) Article based on AIAA Paper 2004-1817

A06-106 Dynamic Characteristic Formulations for Jointed Space Structures. Tomihiko Yoshida, *Nippon Telegraph and Telephone Corporation, Japan* (**43**, 4, p. 771) Article

A06-107 Study on Ground Verification for Large Deployable Modular Structures. Akira Meguro, *NTT Corporation, Japan*; Hironori Ishikawa, *NTT DoCoMo, Inc., Japan*; and Akio Tsujihata, *Japan Aerospace Exploration Agency, Japan* (**43**, 4, p. 780) Article based on AIAA Paper 2002-1606

A06-108 Testing of Membrane Space Structure Shape Control Using Genetic Algorithm. Fujun Peng, Yan-Ru Hu, and Alfred Ng, *Canadian Space Agency, Canada* (**43**, 4, p. 788) Article
Erratum (**43**, 6, p. 1426)

A06-109 Preliminary Design of Multiple Gravity-Assist Trajectories. M. Vasile, *Politecnico di Milano, Italy*; and P. De Pascale, *University of Padova, Italy* (**43**, 4, p. 794) Article

A06-110 Options for a Nondedicated Mission to Test the Pioneer Anomaly. Andreas Rathke, *Eads Astrium GmbH, The Netherlands*; and Dario Izzo, *ESA, The Netherlands* (**43**, 4, p. 806) Article

A06-111 Maximizing Payload Mass Fractions of Spacecraft for Interplanetary Electric Propulsion Missions. Prashant Patel, Daniel Scheeres, and Alec Gallimore, *University of Michigan* (**43**, 4, p. 822) Article

A06-112 Sample Return from Mercury and Other Terrestrial Planets Using Solar Sail Propulsion. Gareth W. Hughes and Malcolm Macdonald, *University of Glasgow, Scotland, U.K.*; Colin R. McInnes, *University of Strathclyde, Scotland, U.K.*; Alessandro Atzei and Peter Falkner, *ESA, The Netherlands* (**43**, 4, p. 828) Article

A06-113 Sensitivity Analysis for Rapid Prototyping of Entry Vehicles. Scott B. Josselyn and I. M. Ross, *Naval Postgraduate School* (**43**, 4, p. 836) Article based on AIAA Paper 2003-5500

A06-114 Effect of Computational Method on Discrete Roughness Correlations for Shuttle Orbiter. Scott A. Berry, H. H. Hamilton, and Kathryn E. Wurster, *NASA Langley Research Center* (**43**, 4, p. 842) Article based on AIAA Paper 2002-2744

A06-115 Study of the Ignition Overpressure Suppression Technique by Water Addition. Francisco Canabal, *NASA Marshall Space Flight Center*; and AbdelKader Frendi, *University of Alabama in Huntsville* (**43**, 4, p. 853) Article

A06-116 Investigation of Force-Limited Vibration for Reduction of Overtesting. Y. Soucy, *Canadian Space Agency, Canada*; V. Dharanipathi and R. Sedaghati, *Concordia University, Canada* (**43**, 4, p. 866) Article

A06-117 Noise Control of Mock-Scale ChamberCore Payload Fairing Using Integrated Acoustic Resonators. Deyu Li and Jeffery S. Vipperman, *University of Pittsburgh* (**43**, 4, p. 877) Article

A06-118 Small Mission Design for Testing In-Orbit an Electrodynamic Tether Deorbiting System. P. Tortora, *University of Bologna, Italy*; L. Somenzi and L. Iess, *University of Rome "La Sapienza", Italy*; and R. Licata, *Alenia Spazio, Italy* (**43**, 4, p. 883) Article

A06-119 Launch Vehicle Propulsion Design with Multiple Selection Criteria. Joey D. Shelton, *NASA Marshall Space Flight Center*; Robert A. Frederick, *University of Alabama in Huntsville*; and Alan W. Wilhite, *Georgia Institute of Technology* (**43**, 4, p. 893) Article based on AIAA Paper 2005-3581

A06-120 Utilization Rates of Geostationary Communication Satellites: Models of Loading Dynamics. J. H. Saleh and J. P. Torres-Padilla, *Massachusetts Institute of Technology*; E. Morgan, *Communications Center*; and R. Sperber, *Syren, Luxembourg* (**43**, 4, p. 903) Article

A06-121 Apollo Lunar Orbit Rendezvous Architecture Decision Revisited. David M. Reeves, Michael D. Scher, Alan W. Wilhite, and Douglas O. Stanley, *National Institute of Aerospace* (**43**, 4, p. 910) Article based on AIAA Paper 2005-4011

A06-122 New Calculation Method of Supersonic/Hypersonic Flow: Application to Hypersonic MESUR Capsule Flowfield. Masatomi Nishio, Keiji Manabe, and Hiroaki Nakamura, *Fukuyama University, Japan* (**43**, 4, p. 916) Technical Note

A06-123 Modeling and Simulation of Turbulent Reacting Flow Around a Hypersonic Space Probe. N. T.-H. Nguyen-Bui and G. Duffa, *Commissariat a l'Energie Atomique, France* (**43**, 4, p. 919) Technical Note based on AIAA Paper 2004-2339

A06-124 Classical Orbit Element Differences Determination Using Relative Position Coordinates. Zhe Dong and Zheng You, *Tsinghua University, China (PRC)*; and Xiaomin Zhang, *DFH Satellite Corporation, China (PRC)* (**43**, 4, p. 923) Technical Note

A06-125 Afterbody Aeroheating Flight Data for Planetary Probe Thermal Protection System Design. Michael J. Wright and Frank S. Milos, *NASA Ames Research Center*; and Phillippe Tran, *EADS SPACE Transportation, France* (**43**, 5, p. 929) Survey Paper based on AIAA Paper 2005-4815

A06-126 History of Space Shuttle Rendezvous and Proximity Operations. John L. Goodman, *United Space Alliance, LLC* (**43**, 5, p. 944) History of Key Technologies

A06-127 Solar Polar Orbiter: A Solar Sail Technology Reference Study. Malcolm Macdonald and Gareth Hughes, *University of Glasgow, Scotland, U.K.*; Colin McInnes, *University of Strathclyde, Scotland, U.K.*; Aleksander Lyngvi, Peter Falkner, and Alessandro Atzei, *ESA, The Netherlands* (**43**, 5, p. 960) Article

A06-128 Numerical Study of Behavior of Outgas from Heat Shield of Solar Probe. Kojiro Suzuki, *University of Tokyo, Japan* (**43**, 5, p. 973) Article based on AIAA Paper 2004-2271

A06-129 Laser Window Design for the Army Hypersonic Compact Kinetic Energy Missile. Gerald Russell, Stephen Cayson, Mike Jones, Wendy Carriger, and Robert Mitchell, *U.S. Army Aviation and Missile Research Development and Engineering Center*; Forrest Strobel and Michael Rembert, *ITT Industries Advanced Engieering Sciences*; and David Gibson, *Summit Research Corporation* (**43**, 5, p. 982) Article

A06-130 Optimization of Viscous Waveriders Derived from Axisymmetric Power-Law Blunt Body Flows. B. Mangin, *Centre National de la Recherche Scientifique, France*; R Benay and Bruno Chanetz, *ONERA DAFE, France*; and A. Chpoun, *Centre National de la Recherche Scientifique, France* (**43**, 5, p. 990) Article

A06-131 Computer Simulation and its Experimental Verification of Atomic Oxygen Concentration. Masahito Tagawa, Koshi Matsumoto, Hiroaki Doi, and Kumiko Yokota, *Kobe University, Japan* (**43**, 5, p. 999) Article

A06-132 Catalytic and Radiative Behaviors of ZrB2-SiC Ultrahigh Temperature Ceramic Composites. Luigi Scatteia, *Centre Italiano Ricerche Aerospaziali, Italy*; Raffaele Borrelli, *University of Salerno, Italy*; Giovanni Cosentino, *Centre Italiano Ricerche Aerospaziali, Italy*; Eric Beche, Jean-Louis Sans, and Marianne Balat-Pichelin, *Procedes Materiaux et Energie Solaire-Centre Nationale de la Recherche Scientifique Laboratory, France* (**43**, 5, p. 1004) Article

A06-133 Nozzle Plume Impingement on Spacecraft Surfaces: Effects of Surface Roughness. C. Ngalande, T. Lilly, M. Killingsworth, and S. Gimelshein, *University of Southern California*; and A. Ketsdever, *U. S. Air Force Research Laboratory* (**43**, 5, p. 1013) Article

A06-134 Mars Exploration Rover Six-Degree-of-Freedom Entry Trajectory Analysis. Prasun N. Desai, Mark Schoenenberger, and F. M. Cheatwood, *NASA Langley Research Center* (**43**, 5, p. 1019) Article

A06-135 Design of the ARES Mars Airplane and Mission Architecture. Robert D. Braun, *Georgia Institute of Technology*; Henry S. Wright, Mark A. Croom, and Joel S. Levine, *NASA Langley Research Center*; and David A. Spencer, *Jet Propulsion Laboratory, California Institute of Technology* (**43**, 5, p. 1026) Article

A06-136 Trajectories for Human Missions to Mars, Part I: Impulsive Transfers. Damon F. Landau and James M. Longuski, *Purdue University* (**43**, 5, p. 1035) Article based on AIAA Paper 2004-5095

A06-137 Trajectories for Human Missions to Mars, Part II: Low-Thrust Transfers. Damon F. Landau and James M. Longuski, *Purdue University* (**43**, 5, p. 1043) Article

A06-138 Automated Operational Orbit Determination for the Ice Cloud and Land Elevation Satellite Mission. Matthew C. Meek, George H. Born, and Penina Axelrad, *University of Colorado at Boulder* (**43**, 5, p. 1048) Article

A06-139 Trajectory Design and Maneuver Strategy for the MESSENGER Mission to Mercury. James V. McAdams, David W. Dunham, and Robert W. Farquhar, *Johns Hopkins University Applied Physics Laboratory*; Anthony H. Taylor and Bobby G. Williams, *KinetX, Inc.* (**43**, 5, p. 1054) Article

A06-140 Preliminary Design of Low-Thrust Multiple Gravity-Assist Trajectories. P. De Pascale, *University of Padova, Italy*; and M. Vasile, *Politecnico di Milano, Italy* (**43**, 5, p. 1065) Article

A06-141 Solar Electric and Chemical Propulsion for a Titan Mission. Michael L. Cupples and Shaun Green, *Science Applications International Corporation*; Victoria L. Coverstone, *University Of Illinois at Urbana-Champaign*; and Benjamin Donahue, *The Boeing Company* (**43**, 5, p. 1077) Article based on AIAA Paper 2003-4728

A06-142 Effect of Pin-to-Case Electrostatic Discharge on Electro-explosive Zdeice Insulation Resistance. J. E. Hansen, *Lockheed Martin Space Systems*; C. E. Lord, *McCormick Selph, Inc.*; L. C. Yang, *Northrop Grumman Corporation*; M. M. Simpson, *The Aerospace Corporation*; and K. S. Orme, *U. S. Air Force Space and Missile Systems Center* (**43**, 5, p. 1084) Article based on AIAA Paper 2003-5137

A06-143 Micromechanical Models for Bending Behavior of Woven Composites. Omer Soykasap, *Afyon Kocatepe University, Turkey* (**43**, 5, p. 1093) Article based on AIAA Paper 2005-2264

A06-144 Global/Local Analysis Strategy for Partly Wrinkled Membrane. Kyeongsik Woo, *Chungbuk National University, South Korea*; and Christopher H. Jenkins, *Montana State University* (**43**, 5, p. 1101) Article based on AIAA Paper 2005-1977

A06-145 Distributed and Localized Active Vibration Isolation in Membrane Structures. Hiraku Sakamoto and K. C. Park, *University of Colorado at Boulder*; and Yasuyuki Miyazaki, *Nihon University, Japan* (**43**, 5, p. 1107) Article

A06-146 Liquid Propellant Migration Control for a Teardrop Tank System. Masahiko Utsumi, *Ishikawajima-Harima Heavy Industries Company, Ltd., Japan* (**43**, 5, p. 1117) Article

A06-147 Vented Tank Resupply Experiment: Flight Test Results. David J. Chato, *NASA Glenn Research Center*; and Timothy A. Martin, *Lockheed Martin Space Systems* (**43**, 5, p. 1124) Article based on AIAA Paper 97-2815

Erratum (**43**, 6, p. 1426)

A06-148 Role of Water Vapor in Solar Array Arc Initiation: Dissociative Recombination Processes. Joel T. Galofaro, *NASA John H. Glenn Research Center at Lewis Field*; Boris V. Vayner, *Ohio Aerospace Institute*; Wilhelmus A. Degroot, *Silicon Light, Inc.*; and Dale C. Ferguson, *NASA Marshall Space Flight Center* (**43**, 5, p. 1131) Article based on AIAA Paper 2002-0938

A06-149 Sapphire: Case Study for Student-Built Spacecraft. M. Swartwout, *Washington University*; C. Kitts, *Santa Clara University*; and J. Cutler, *Stanford University* (**43**, 5, p. 1136) Technical Note

A06-150 Studies on Internal Flow Choking in Dual-Thrust Motors. VR Sanal Kumar, *Vikram Sarabhai Space Centre, India*; BN Raghunandan, *Indian Institute of Science, India*; HD Kim and A Sameen, *Andong National University, Republic of Korea*; T Setoguchi, *Saga University, Japan*; and S Raghunathan, *Queen's University of Belfast, Northern Ireland, U.K.* (**43**, 5, p. 1139) Technical Note based on AIAA Paper 2005-4147

A06-151 Direct Numerical Computation of Periodic Orbits and Their Stability. Paul Williams, *RMIT University, Australia* (**43**, 5, p. 1143) Technical Note

A06-152 Numerical Simulation of Wrinkles in Space Inflatable Membrane Structures. C. Wang, X. Du, and Z. Wan, *Harbin Institute of Technology, China (PRC)* (**43**, 5, p. 1146) Technical Note based on AIAA Paper 2006-1797

Erratum (**43**, 6, p. 1426)

A06-153 Active Vibration Isolation of Rigid Body Using a Pneumatic Octostrut Platform. Q.J. Yang, *Harbin Institute of Technology, China (PRC)*; G.T. Zheng, *Tsinghua University, China (PRC)*; and W.H. Huang, *Harbin Institute of Technology, China (PRC)* (**43**, 5, p. 1149) Technical Note

A06-154 Satellite Constellation Design Trade-offs using Multiple-Objective Evolutionary Computation. Matthew P. Ferringer, *The Aerospace Corporation*; and David B. Spencer, *Pennsylvania State University* (**43**, 6, p. 1404) Article

A06-155 Laminar-Turbulent Transition on Reentry Capsules and Planetary Probes. Steven P. Schneider, *Purdue University* (**43**, 6, p. 1153) Survey Paper based on AIAA Paper 2005-4763

A06-156 Space Structures on the Back of an Envelope: John Hedgepeth's Design Approach. Mark S. Lake, *Composite Technology Development*; Lee D. Peterson and Martin M. Mikulas, *University of Colorado* (**43**, 6, p. 1174) Article based on AIAA Paper 2003-1448

A06-157 Web-Based Computational Investigation of Aerothermodynamics of Atmospheric Entry Vehicles. Periklis Papadopoulos and Prabhakar Subrahmanyam, *San Jose State University* (**43**, 6, p. 1184) Article

A06-158 Low-Density Aerodynamics for the Inflatable Reentry Vehicle Experiment. James N. Moss, Christopher E. Glass, and Brian R. Hollis, *NASA Langley Research Center*; and John W. Van Norman, *Analytical Mechanics Associates, Inc.* (**43**, 6, p. 1191) Article based on AIAA Paper 2006-1189

A06-159 Boundary Layer/Streamline Surface Catalytic Heating Predictions on Space Shuttle Orbiter. Jeremiah J. Marichalar and William C. Rochelle, *Engineering and Science Contract Group (ESCG)/Jacobs Sverdrup*; Benjamin S. Kirk and Charles H. Campbell, *NASA Johnson Space Center* (**43**, 6, p. 1202) Article based on AIAA Paper 2006-180

A06-160 Design of a Pulse-Facility Nozzle Using the Rotational Method Of Characteristics. Richard L. Gaffney, *NASA Langley Research Center* (**43**, 6, p. 1216) Article based on AIAA Paper 2005-0691

A06-161 Application of Solar Electric Propulsion to a Comet Surface Sample Return Mission. Byoungsam Woo and Victoria L. Coverstone, *University of Illinois at Urbana-Champaign*; and Michael Cupples, *Science Applications International Corporation* (**43**, 6, p. 1225) Article based on AIAA Paper 2004-3804

A06-162 Flexible Piloted Mars Missions Using Continuous Electric Propulsion. Tanja D. Schmidt and Wolfgang Seboldt, *DLR, German Aerospace Center, Germany*; and Monika Auweter-Kurtz, *University of Stuttgart, Germany* (**43**, 6, p. 1231) Article

A06-163 Mission Design for the Innovative Interstellar Explorer Vision Mission. Douglas I. Fiehler, *QSS Group, Inc.*; and Ralph L. McNutt, *Johns Hopkins University* (**43**, 6, p. 1239) Article

A06-164 Stochastic Spacecraft Thermal Design Optimization with Low Computational Cost. Issamu Muraoka, Roberto L. Galski, Fabiano L. de Sousa, and Fernando M. Ramos, *Instituto Nacional de Pesquisas Espaciais, Brazil* (**43**, 6, p. 1248) Article

A06-165 Simulations of Solid-Propellant Rockets: Effects of Aluminum Droplet Size Distribution. F. M. Najjar, J. P. Ferry, A. Haselbacher, and S. Balachandar, *University of Illinois at Urbana-Champaign* (**43**, 6, p. 1258) Article

A06-166 New Approach for the Evolution and Expansion of Space Debris Scenario. M. R. Ananthasayanam, *Indian Institute of Science, India*; A. K. Anilkumar and P. V. Subba Rao, *Indian Space Research Organization, India* (**43**, 6, p. 1271) Article

A06-167 Practical Operation Strategy for Deorbit of an Electrodynamic Tethered System. Noboru Takeichi, *Japan Aerospace Exploration Agency, Japan* (**43**, 6, p. 1283) Article

A06-168 Evaluation of Multidisciplinary Optimization Techniques Applied to a Reusable Launch Vehicle. Nichols F. Brown, *Northrop Grumman Corporation*; and John R. Olds, *Georgia Institute of Technology* (**43**, 6, p. 1289) Article based on AIAA Paper 2005-707

A06-169 Analysis of Gossamer Structures Using Assumed Strain Solid-Shell Finite Elements. Keejoo Lee and Sung W. Lee, *University of Maryland* (**43**, 6, p. 1301) Article based on AIAA Paper 2005-1802

A06-170 Stochastic Launcher-Satellite Coupled Dynamic Analysis. Manuel F. Pellissetti, *Leopold-Franzens University, Austria*; Sebastiaan H. Fransen, *European Space Agency, The Netherlands*; Helmut J. Pradlwarter, *Leopold-Franzens University, Austria*; Adriano Calvi, *European Space Agency, The Netherlands*; Andreas Kreis, *Andreas Kreis Consultancies, The Netherlands*; Gerhart I. Schuëller, *Leopold-Franzens University, Austria*; and Michel Klein, *European Space Agency, The Netherlands* (**43**, 6, p. 1308) Article

A06-171 Structural Integrity of Flat Silicon Panels for Nanosatellites: Modeling and Testing. Hugo Nguyen, Robert Thorslund, Greger Thornell, Johan Köhler, and Lars Stenmark, *Ångström Space Technology Centre, Sweden* (**43**, 6, p. 1319) Article

A06-172 Reconfiguration of Sun-Earth Libration Point Formations Using Solar Radiation Pressure. Hongming Li and Trevor Williams, *University of Cincinnati* (**43**, 6, p. 1328) Article based on AIAA Paper 2004-4785

A06-173 Effect of Magnetic Fields on Surface Plasma Discharges at Mach 5. Roger L. Kimmel and James R. Hayes, *U. S. Air Force Research Laboratory*; James A. Menart and Joseph Shang, *Wright State University* (**43**, 6, p. 1340) Article based on AIAA Paper 2004-2661

A06-174 Midcourse Space Experiment: Off-Axis Rejection Performance of the Infrared Sensor. Robert R. O'Neil and James Gibson, *U. S. Air Force Research Laboratory*; and Edward Richards, *Boston College* (**43**, 6, p. 1347) Article

A06-175 Generator Regime of Self-Balanced Electrodynamic Bare Tethers. J. Peláez, *Technical University of Madrid, Spain*; and M. Sanjurjo, *Technical University of Munich, Spain* (**43**, 6, p. 1359) Article

A06-176 Far-Field Spectral Analysis of a Space Shuttle Vernier Reaction Control System Firing. Lawrence S. Bernstein and Matthew Braunstein, *Spectral Sciences Inc.*; A. L. Broadfoot, *University of Arizona*; William L. Dimpfl, *Aerospace Corporation*; Rainer A. Dressler, *U. S. Air Force Research Laboratory/VSB*; Yu-hui Chiu, James A. Gardner, and Edmond Murad, *U. S. Air Force Research Laboratory* (**43**, 6, p. 1370) Article

A06-177 Design and Modeling of a Thermally Regulated Communications Mode for Nanospacecraft. Henrik Kratz, Mikael Karlsson, Anders Eriksson, Johan Köhler, Lars Stenmark, and Greger Thornell, *Uppsala University, Sweden* (**43**, 6, p. 1377) Article

A06-178 Simulation of Aerodynamic Influences on Rocket-Mounted Oxygen Sensors. Jeffrey Allen, Mark Perl, and Thomas Hauser, *Utah State University* (**43**, 6, p. 1387) Article based on AIAA Paper 2005-5287

A06-179 Use of Genetic Algorithms and Transient Models for Life Support Systems Analysis. Luis F. Rodriguez, *University of Illinois at Urbana-Champaign*; Scott Bell and David Kortenkamp, *NASA Johnson Space Center* (**43**, 6, p. 1395) Article based on AIAA Paper 2005-2708

A06-180 Collision Risk Posed to the Global Positioning System by Disposed Upper Stages. Alan B. Jenkin and R. A. Gick, *The Aerospace Corporation* (**43**, 6, p. 1412) Article

A06-181 Effects of Angle-of-Attack on the Aeroelastic Characteristics of a Wing with Freeplay. Young-Keun Park, Jae-Han Yoo, and In Lee, *Korea Advanced Institute of Science and Technology, South Korea*; and Dae-Yeal Lee, *Agency for Defense Development, South Korea* (**43**, 6, p. 1419) Technical Note

A06-182 Flight Dynamics of Unguided Rockets with Free-Rolling Wraparound Tail Fins. J. Morote and G. Liaño, *National Institute of Aerospace Technology, Spain* (**43**, 6, p. 1422) Technical Note based on AIAA Paper 2005-437

A06-183 Evaluation of Guidance and Control Systems of a Balloon-Launched Drop-Test Vehicle. Tetsujiro Ninomiya, Hirokazu Suzuki, and Taro Tsukamoto, *Japan Aerospace Exploration Agency, Japan* (**43**, 6, p. 1423) Technical Note
